RE: Application No. 05-0521 -Application for Renewal for the site located:

Approximately 400 feet north of Victory Highway, by utility pole no. 299, approximately 1,250 feet west-southwest of the intersection of Gazza Road and Main Street, Assessor's Plat 214, Lot 7, Burrillville, RI.

Dear Mr. and Mrs. Greenough:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your Application for Renewal received on May 24, 2017.

It is our understanding that you are requesting renewal of the permit issued for Application No. 05-0521. The original permit was issued on October 16, 2007 to C. Pepin & Son, Inc. for alterations to freshwater wetlands at the above referenced location.

This Program has completed an inspection of the site and has found that your project, at this time, is in conformance with those conditions set forth in the permit letter as well as the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules). It is our determination, therefore, that the permit may be renewed. This renewal is valid until June 6, 2018 and expires on that date unless an additional renewal is allowed and authorized in accordance with the Rules (See Rule 11.02). A copy of the original permit letter of October 16, 2007 is enclosed for your convenience.

Please be advised that this is the final renewal allowed pursuant to Rule 10.07(F). Therefore, no further renewal may be granted unless you or a subsequent transferee can satisfactorily demonstrate to the Department that the permitted wetland alterations are being carried out in strict accordance with the permit and the Rules, and that the alterations can be completed in a period of one (1) additional year or less [Rule 10.07 (F)]. Any such renewal must be requested in accordance with Rule 11.02.

Please ensure that the sign that identifies the initials "DEM" and the application number of this permit is posted and maintained at the site in a conspicuous location when work commences.

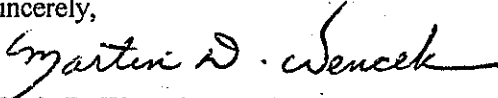

It is your responsibility to maintain compliance with the conditions of the permit and to carry out this project in compliance with the Rules at all times. This renewal does not relieve you of any obligations to obtain any local, state, or federal approvals or permits as required by ordinance or law.

Application No. 05-0521

Permit Renewal

Re: Application No. 05-0521 in reference to the location below:

Approximately 400 feet north of Victory Highway, by utility pole no. 299, approximately 1,250 feet west-southwest of the intersection of Gazza Road and Main Street, Assessor's Plat 214, Lot 7, Burrillville, RI.

Dear Mr. & Mrs. Greenough:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Application for Renewal** received on September 29, 2009.

It is our understanding that you are requesting renewal of the permit issued for Application No. 06-0381. The original permit was issued on October 16, 2007 to C. Pepin & Sons for alterations to freshwater wetlands at the above-referenced location.

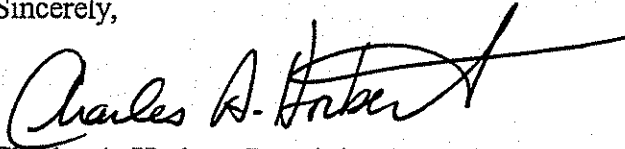

This Program has completed a review of your application and has noted that your project has not yet started at this time. In all other respects, it is in conformance with those conditions set forth in the original permit as well as the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules). It is our determination, therefore, that the permit may be renewed. This renewal is valid until **October 16, 2010** and expires on that date unless an additional renewal is allowed and authorized in accordance with Rules (See Rule 11.02 of the current Rules).

It is your responsibility to maintain compliance with the conditions of the original permit (copy enclosed) and to carry out this project in compliance with the Rules at all times. This renewal does not relieve you of any obligations to obtain any local, state, or federal approvals or permits as required by ordinance or law. Any modifications to the project not illustrated on the approved site plans would require approval of, at least, an Application for Permit Modification prior to the expiration of the permit.

Please contact me directly (telephone: 401-222-6820, ext. 7402) should you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Charles A. Horbert". The signature is written in black ink and is positioned above the typed name.

PERMIT TO ALTER FRESHWATER WETLANDS

Re: Application No.05-0521 in reference to the location below:

Approximately 400 feet north of Victory Highway, by utility pole no. 299, approximately 1,250 feet west-southwest of the intersection of Gazza Road and Main Street, Assessor's Plat 214, Lot 7, Burrillville, RI.

Dear Mr. Pepin:

The Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Application to Alter a Freshwater Wetland** regarding the proposed construction of a three (3)-bedroom single family dwelling with associated driveway, septic system, private well, utilities and landscaping as described and detailed in the material and information submitted in support of your application and on site plans received by the DEM on March 22, 2007. These site plans describing the project were made available for public comment as part of the forty-five (45) day public notice period required in accordance with the Freshwater Wetlands Act (R.I. General Laws (R.I.G.L.) Section 2-1-18 et seq.) and the procedures set forth in Rule 9.05 of the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules).

This Program received one (1) letter relating to your application which was submitted during the public notice period. This letter expressed concern regarding your project's impacts to freshwater wetland values. This Program reviewed this letter together with any supporting documents and evaluated the potential impacts from the project upon the values mentioned in the letter. The Program has determined that the comments contained within this letter do not constitute an objection of a substantive nature as defined in Rule 5.53. Therefore, a public hearing pursuant to R.I.G.L. Section 2-1-22 is not required.

Pursuant to the Program's review and evaluation of your application including all supporting information and material, as well as the record to date, the Program has determined that this project does not represent a random, unnecessary or undesirable alteration of freshwater wetlands. Therefore, this Program hereby issues this permit to alter freshwater wetlands **subject to all controlling Rules and the Terms and Conditions set forth herein.**

Permit Terms and Conditions for Application No. 05-0521:

1. This letter is the DEM's permit for this project under the R.I. Fresh Water Wetlands Act, Rhode Island General Laws (RIGL) Section 2-1-18 et seq.
2. This permit is specifically limited to the project, site alterations and limits of disturbance as detailed on the site plans submitted with your application and received by the DEM on March 22, 2007. A copy of the site plans stamped approved by the DEM is enclosed. Changes or revisions to the project which would alter freshwater wetlands are not authorized without a permit from the DEM.
3. Where the terms and conditions of the permit conflict with the approved site plans, these terms and conditions shall be deemed to supersede the site plans.
4. You must notify this Program in writing immediately prior to the commencement of site alterations and upon completion of the project.
5. A copy of the stamped approved site plans and a copy of this permit must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this permit and the stamped approved plans must be made available for review by any DEM representative upon request.
6. Within ten (10) days of the receipt of this permit, you must record this permit in the land evidence records of the Town of Burrillville and supply this Program with written documentation obtained from the Town showing this permit was recorded.
7. The effective date of this permit is the date this letter was issued. This permit expires one (1) year from the effective date unless renewed pursuant to Rule 9.07.
8. Any material utilized in this project must be clean and free of matter that could pollute any freshwater wetland.
9. Prior to commencement of site alterations, you shall erect or post a sign resistant to the weather and at least twelve (12) inches wide and eighteen (18) inches long, which boldly identifies the initials "DEM" and the application number of this permit. This sign must be maintained at the site in a conspicuous location until such time that the project is complete or the DEM issues a Notice of Completion of Work for the project.
10. Temporary erosion and sediment controls detailed or described on the approved site plans shall be properly installed at the site prior to or commensurate with site alterations. Such controls shall be properly maintained, replaced, supplemented, or modified as necessary throughout the life of this project to minimize soil erosion and to prevent sediment from being deposited in any wetlands not subject to disturbance under this permit.
11. Upon permanent stabilization of all disturbed soils, temporary erosion and/or sediment controls consisting of Staked hay bales or silt fence must be removed.

12. You are obligated to install, utilize and follow all best management practices detailed or described on the approved site plans in the construction of the project to minimize or prevent adverse impacts to any adjacent freshwater wetlands and the functions and values provided by such wetlands.
13. All construction activities involving driveway installation within the swamp and stream must be limited to the period from July 1 through October 31 of any calendar year.
14. All plantings of shrubs, trees or other forms of vegetation as shown or detailed on the approved plans, or detailed in this permit, must be installed as soon as possible after completion of final grading; weather and season permitting. You must notify this Program in writing upon completion of the required plantings for a compliance inspection by a Program representative.
15. Buffer zone plantings of trees and/or shrubs proposed between the project and any adjacent freshwater wetland areas, except for necessary replacement, must be allowed to develop naturally without being subjected to mowing or manicuring. Any plants not surviving at least one full year must be replaced in kind. Likewise, any replacement plant not surviving a full year must also be replaced in kind.
16. Artificial lighting along the driveway/roadway where it crosses freshwater wetlands is not authorized in this permit.
17. This Program has made specific revisions to the approved site plans. These revisions are clearly marked in red on the approved plans. This project must take place in compliance with these revisions. Specifically, a) plant substitutions are required where northern white cedar trees must be installed in lieu of inkberry and red maple to maintain a contiguous evergreen buffer between the driveway and the swamp along both sides of the driveway from Station 3+00 to Station 3+75; b) a denser row of northern white cedar trees must be installed from Station 0+20 to Station 1+30, and from Station 2+70 to Station 4+25. The spacing between the plants within these specific sections must not exceed seven (7) feet on center but can be as close as five (5) feet on center; and c) please also be advised that you may omit planting northern white cedar trees along both sides of the driveway from Stations 1+30 to Station 2+30.
18. A copy of this permit and a copy of the approved site plans must be forwarded to the I.S.D.S. Program of the DEM's office of Water Resources. A permit is needed from the I.S.D.S. Program prior to commencing any work on this project.

This Permit also constitutes your authorization from the U.S. Army Corps of Engineers ("Corps") under Section 404 of the Clean Water Act for the work proposed. Your project qualifies as a Category I activity under the Rhode Island Programmatic General Permit (RI PGP, Permit No. 57). You are, therefore, not required to file a separate application with the Corps.

Please note that the attached RI PGP conditions apply to all activities authorized under the RI PGP. Please review them carefully to thoroughly familiarize yourself with their contents. You may wish to discuss all permit conditions with your contractor to ensure that the work can be accomplished in a manner that conforms to all requirements.

This permit is valid for the original applicant only and is not transferable to another person unless the new owner completes and submits an **Application for Permit Transfer** in accordance with Rule 9.08.

You are required to comply with the terms and conditions of this permit and to carry out this project in compliance with the Rules at all times. Failure to do so may result in an enforcement action against you by the DEM and/or subject you to the enforcement provisions of the Corps' regulations.

In permitting the proposed alterations, the Program assumes no responsibility for damages resulting from faulty design or construction. This permit does not remove your obligation to obtain any local, state, or federal approvals or permits required by ordinance or law and does not relieve you from any duties owed to adjacent landowners with specific reference to any changes in drainage.

If you are aggrieved by this decision, you may, within thirty (30) days of the receipt of this letter, request an adjudicatory hearing in writing. This request must be sent directly to the DEM Administrative Adjudication Division ("AAD"), 235 Promenade Street, Providence, RI 02908. A copy of the request should also be forwarded to this Program and to the Office of Legal Services, at the same address. Your written request for an adjudicatory hearing must be timely filed and should conform to the requirements of Rule 7.00(b) of the "Administrative Rules of Practice and Procedure for the Department of Environmental Management Administrative Adjudication Division for Environmental Matters", (AAD Rules). AAD Rule 7.00(b) provides:

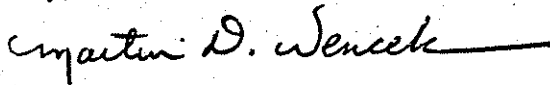

"The request for hearing shall state clearly and concisely the specific issues which are in dispute and the facts in support thereof, the relief sought if any, the license or permit sought or involved and any additional information required by applicable statutes and regulations."

The written request must be accompanied by an adjudicatory hearing fee of two thousand dollars (\$2,000.00); in the form of a certified bank check or money order made payable to the Rhode Island General Treasurer; however, in the event that the cost of the hearing exceeds the fee paid, the Program through the AAD will require an additional fee which the applicant must submit prior to the DEM's issuance of any final decision regarding this application. The adjudicatory hearing will be held before a Hearing Officer from the AAD. Such hearing will be held in compliance with the AAD Rules, Chapter 42-35-1 et seq. of the R.I.G.L., and other governing laws, rules, and regulations adopted by the DEM. Please note that you have the right to be represented by legal counsel in any proceeding which may be held in this matter.

Application No. 05-0521
