Seth Wilson  
70 Great Road  
East Greenwich, RI 02818

### REVISED PERMIT

Re: Application No. 07-0239 in reference to the location below:

Approximately 200 feet northeast of Great Road, approximately 860 feet east of the intersection of Great Road and Kent Road, Assessor's Plat 10, Lots 385 & 386, East Greenwich, RI.

Dear Mr. Wilson:

The Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Application for Permit Modification** and has evaluated your proposed modifications to the permitted single-family home with attached garage, deck, paved driveway, utility lines, and landscaped yard, as illustrated and detailed on revised site plans submitted with your application. The revised site plans were received on November 7, 2008 and illustrate a revised planting detail.

Based upon the Program's evaluation of the revised project and pursuant to Rule 11.03 of the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules), it is the Program's determination that a revised permit for the modified project may be issued under the following terms and conditions:

1. This letter is the DEM's revised permit for this project under the R.I. Fresh Water Wetlands Act, Rhode Island General Laws (RIGL) Section 2-1-18 et seq.
2. This revised permit is specifically limited to the project, site alterations and limits of disturbance as detailed on the site plans submitted with your application and received by the DEM on November 7, 2008. A copy of the site plans stamped approved by the DEM is enclosed. Changes or revisions to the project that would alter freshwater wetlands are not authorized without a permit from the DEM.
3. Where the terms and conditions of the revised permit conflict with the approved site plans, these terms and conditions shall be deemed to supersede the site plans.
4. A copy of the stamped approved site plans and a copy of this revised permit must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this revised permit and the stamped approved plans must be made available for review by any DEM representative upon request.
5. Within ten (10) days of the receipt of this revised permit, you must record this permit in the land evidence records of the Town of East Greenwich and supply this Program with written documentation obtained from the Town showing this revised permit was recorded.

6. This revised permit expires four (4) years from the date of issue of the original letter of September 27, 2007.
7. All plantings of shrubs, trees or other forms of vegetation as shown or detailed on the approved plans, or detailed in this permit, must be installed no later than May 31, 2009. You must notify this Program in writing upon completion of the required plantings for a compliance inspection by a Program representative.
8. Buffer zone plantings of trees and/or shrubs proposed between the project and any adjacent freshwater wetland areas, except for necessary replacement, must be allowed to develop naturally without being subjected to mowing or manicuring.
9. As previously discussed and itemized in the letter of nonconformance dated October 27, 2008, buffer markers already installed must be rotated so that they are facing the existing dwelling.

Except as authorized in this revised permit, pursuant to revised and approved site plans (enclosed), all terms and conditions previously specified in the Program's permit dated September 27, 2007 (copy enclosed) remain in effect.

This revised permit is valid for the original applicant only unless transferred pursuant to Rule 7.09 of the Rules.

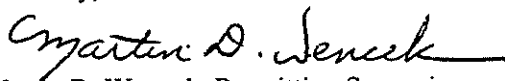

You are required to comply with the terms and conditions of this revised permit and to carry out this project in compliance with the Rules at all times. Failure to do so may result in an enforcement action by the Program.

In permitting the proposed alterations, the DEM assumes no responsibility for damages resulting from faulty design or construction.

This revised permit does not remove your obligation to obtain any local, state, or federal approvals or permits required by ordinance or law and does not relieve you from any duties owed to adjacent landowners with specific reference to any changes in drainage.

Please contact Claire Swift of this Program (telephone: 401-277-6820 ext. 7418) should you have any questions regarding this letter.

Sincerely,

Martin D. Wencek, Permitting Supervisor  
Office of Water Resources  
Freshwater Wetlands Program

**Insignificant Alteration - Permit**

**(Exhibit B)**

Re: Application No. 07-0239 in reference to the location below:

Approximately 200 feet northeast of Great Road, approximately 860 feet east of the intersection of Great Road and Kent Road, AP 10 Lots 385 & 386, East Greenwich, RI.

Dear Mr. Parker:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request for Preliminary Determination** application. This review included a site inspection of the above referenced property ("subject property") and an evaluation of the proposed construction of two single-family homes, each with attached garage, deck, paved driveway, utility lines, and landscaped yard as illustrated and detailed on site plans submitted with your application. These site plans were received on July 27, 2007.

Our observations of the subject property, review of the site plans and evaluation of the proposed project reveals that alterations of freshwater wetlands are proposed. However, pursuant to Rule 9.03 of the Rules and Regulations Governing the Administration and Enforcement of the Fresh Water Wetlands Act (Rules), this project may be permitted as an **insignificant alteration** to freshwater wetlands under the following terms and conditions:

Terms and Conditions for Application No. 07-0239:

1. This letter is the DEM's permit ("permit", or "permit letter") for this project under the R.I. Fresh Water Wetlands Act, Rhode Island General Laws (RIGL) Section 2-1-18 et seq.
2. This permit is specifically limited to the project, site alterations and limits of disturbance as detailed on the site plans submitted with your application and received by the DEM on July 27, 2007. A copy of the site plans stamped approved by the DEM is enclosed and is referenced as exhibit "A". Changes or revisions to the project that would alter freshwater wetlands are not authorized without a permit from the DEM.

Office of Water Resources/Permitting Section/Tel.401-222-6820/Fax:401-222-6177

3. Where the terms and conditions of the permit conflict with the approved site plans, these terms and conditions shall be deemed to supersede the site plans.
4. You must notify this Program in writing immediately prior to the commencement of site alterations and upon completion of the project.
5. A copy of the stamped approved site plans and a copy of this permit must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this permit and the stamped approved plans must be made available for review by any DEM representative upon request.
6. **Within ten (10) days of the receipt of this permit letter, you must record this letter and the attached Environmental Land Use Restriction (hereinafter referred to as "Restriction") in the land evidence records of the Town of East Greenwich and supply this Program with written documentation obtained from the Town showing this permit was recorded.**
7. The effective date of this permit is the date this letter was issued. This permit expires four (4) years from the date of issue.
8. Any material utilized in this project must be clean and free of matter that could pollute any freshwater wetland.
9. Prior to commencement of site alterations, you shall erect or post a sign resistant to the weather and at least twelve (12) inches wide and eighteen (18) inches long, which boldly identifies the initials "DEM" and the application number of this permit. This sign must be maintained at the site in a conspicuous location until such time that the project is complete.
10. Temporary erosion and sediment controls detailed or described on the approved site plans shall be properly installed at the site prior to or commensurate with site alterations. Such controls shall be properly maintained, replaced, supplemented, or modified as necessary throughout the life of this project to minimize soil erosion and to prevent sediment from being deposited in any wetlands not subject to disturbance under this permit.
11. Upon permanent stabilization of all disturbed soils, temporary erosion and/or sediment controls consisting of hay bales and/or silt fence must be removed.
12. You are responsible for the proper operation, maintenance and stability of any mitigative features, facilities, and systems of treatment and control that are installed or used in compliance with this permit to prevent harm to adjacent wetlands.
13. You are obligated to install, utilize and follow all best management practices detailed or described on the approved site plans in the construction of the project to minimize or prevent adverse impacts to any adjacent freshwater wetlands and the functions and values provided by such wetlands.

14. All plantings of shrubs, trees or other forms of vegetation as shown or detailed on the approved plans, or detailed in this permit, must be installed **no later than October 31, 2007**. You must notify this Program in writing upon completion of the required plantings for a compliance inspection by a Program representative.
15. Buffer zone plantings of trees and/or shrubs proposed between the project and any adjacent freshwater wetland areas, except for necessary replacement, must be allowed to develop naturally without being subjected to mowing or manicuring.
16. This Program has made specific revisions to the approved site plans. These revisions are clearly marked in red on the approved plans. This project must take place in compliance with these revisions. **Specifically, an additional row of evergreen plantings must be planted to create an adequate screen between house related activities and the adjacent wetlands. The trees shall be planted behind the proposed rhododendrons and shall consist of a row of arbor vitae (*Thuja occidentalis*) planted eight (8) feet on center, five (5) feet in height after planting. Additionally, this screening vegetation shall be extended along the perimeter wetland as shown. This row of vegetative screen shall be considered the approved limit of disturbance.**
17. This permit supersedes a previous permit issued by the DEM for the subject property under Application No. 99-0395.
18. Permanent buffer zone markers must be installed along the limit of disturbance at the locations indicated in red ink on the approved site plans, in order to provide permanent reference points on site that are clear to present and future property owners. Acceptable permanent type markers include 4" x 4" pressure treated timber posts, galvanized fence posts with cap, or granite or concrete bounds. Markers must extend a minimum 24" above grade. A permanent-type tag or sign labeled "RIDEM Buffer Zone" must be placed on each marker. A permanent-type fence at least 24 " tall placed along the limits of disturbance may be substituted where desired. No alterations of any kind are permitted beyond these markers without first obtaining the necessary permit from this Program. **This work must be completed by October 31, 2007.**
19. Immediately upon installation of the buffer zone markers, this Program must be contacted to arrange an on-site inspection.

**All items stipulated to in the attached Restriction must be adhered to as a condition of this Permit.**

This permit is valid for the original applicant only and is not transferable to another person unless the new owner completes and submits an **Application for Permit Transfer** in accordance with Rule 9.08.

You are required to comply with the terms and conditions of this permit and to carry out this project in compliance with the Rules at all times. Failure to do so may result in an enforcement action by this Department.

In permitting the proposed alterations, the DEM assumes no responsibility for damages resulting from faulty design or construction.

**Kindly be advised that this permit is not equivalent to a verification of the type or extent of freshwater wetlands on site. Should you wish to have the types and extent of freshwater wetlands verified, you may submit the appropriate application in accordance with Rule 9.02.**

This permit does not remove your obligation to obtain any local, state, or federal approvals or permits required by ordinance or law and does not relieve you from any duties owed to adjacent landowners with specific reference to any changes in drainage.

Please contact Claire Swift of this office (telephone: 401-222-6820 x 7418) should you have any questions regarding this letter.

Sincerely,

Martin D. Wencek, Permitting Supervisor
