October 25, 2007

Mike Cabral
35 Nancy Lane
Burrillville, RI 02830

Re: Application No. 07-0344 in reference to the location below:

Approximately 200 feet north of Mount Pleasant Road, near Utility Pole Nos. 86 and 87, and approximately 2,700 feet west of its intersection with Ironmine Road, Assessor's Plat 45, Lot 1, Burrillville, RI.

Dear Mr. Cabral:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request to verify the delineated edge of freshwater wetlands**. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received on August 28, 2007.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Department and include at least the following types:

- Swamp ("A" & "B" series flags)
- Perimeter wetland (that area of land within 50 feet of the edge of any bog, marsh, swamp, or pond)
- Forested wetland ("C"-series flags)
- Stream/intermittent stream (unnamed)
- Riverbank wetland (the area of land within 100 feet of the edge of any flowing body of water 10 feet wide or greater)
- Flood plain (associated with the intermittent stream)

The DEM has completed an inspection and review of the wetland edges delineated by you on-site. It is our determination that the wetland edges delineated on-site are generally accurate. These wetland edges have been shown on the site plan submitted with your application and are referenced as: C4 through C31, B3 through B14, B23 through B30, B40 through B51, and A1 through A12. Please also be advised of the following with respect to the wetlands on site:

- For future site plan submissions, flags C1, C2, and C3 (as found on site) must be surveyed onto the site plans, and connected with flags C31 and C4. The line currently connecting flag C4 to C31 is **not** considered to be the wetland edge.
- The line depicting the 50-foot perimeter wetland must be revised near flag B23 to reflect a distance of 50 feet.

- The intermittent stream generally indicated on the site plans by flags CL1 through CL4 was found to extend on to the property further than depicted on the site plans. Future site plan submissions should depict the general location of the stream and its associated 100-foot riverbank wetland.

Please note that our inspection of the subject property has revealed the presence of other freshwater wetlands not specifically delineated by you. Therefore, you should not infer that any verification of wetland edges carried out by this Department to date represents a determination that this is the extent of all wetlands on your property. **The Department has verified only those edges delineated and shown by you on-site and on site plans submitted with your application and as qualified in this letter.** Should you wish to verify the edge of any additional wetlands, an additional application will be required.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to Section 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules) a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with Rule 8.03(H) of the Rules, this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue.

Please contact Kate McPherson of this Office telephone: (401-222-6820, ext. 7732) should you have any questions regarding this letter.

Sincerely,

Charles A. Horbert, Permitting Supervisor
Office of Water Resources
Freshwater Wetlands Program
