Re: Application No. 08-0082 in reference to the property and proposed project located:

Approximately 30 feet south of the terminus of Jay Court, and approximately 600 feet south of the intersection of Jay Court and Finch Court, Assessor's Plat 35, Lot 382, Cranston, RI

Dear Mr. Decesare:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program, ("Program") has completed its review of your proposed single family dwelling with associated driveway, public utilities, landscaping and associated site alterations as illustrated and detailed on site plans submitted with your application. The site plans referenced by this letter and on file with this Program were received on March 21, 2008.

Our inspection reveals that freshwater wetlands regulated by the DEM are present on or in close proximity to the subject property. Review of your proposed project, however, reveals that this project does not represent an alteration to these freshwater wetlands. It is our determination therefore that a permit for this project pursuant to the Freshwater Wetland Act (Rhode Island General Law Section 2-1-18 et seq.) or the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act is not required. This Determination is **specific to the proposed site alterations illustrated and detailed on site plans on file with this Program** and is further predicated on the following:

1. Adequate measures are employed during and after site alterations to control soil erosion and to prevent any sediment from such erosion being deposited in any freshwater wetlands. You should consult the Rhode Island Soil Erosion and Sediment Control Handbook for appropriate methods to control erosion and prevent sediment from leaving your project site.
2. This determination does not authorize you to modify your project in such a way as to result in the following:
 - a. An increase in the rate and/or volume of surface water runoff flowing into, or draining or diverting from these wetlands; or
 - b. A diversion of groundwater into or away from these wetlands; or
 - c. A modification to the quality of water reaching these wetlands, which could change their natural character.

3. This Program has made a specific revision to the reviewed site plan. This revision is clearly marked in red on the approved plans. This project must take place in compliance with this revision. The Limit of Disturbance has been revised to remain outside of all jurisdictional wetlands (i.e. the 200-foot riverbank wetland).

Please note that this Determination is specific to this proposed project as illustrated on the reviewed site plans, is valid for a limited period of four (4) years from the date of issue, and does not remove your obligation to obtain any local, state or federal approvals or permits required by ordinance or law.

Kindly be advised that this determination is not equivalent to a determination of the type or extent of freshwater wetlands on the subject property. Should you wish to obtain such verification, you may submit an application in accordance with Rule 8.03.

Modification to your project, which would result in an alteration or allowing your project to result in an alteration to freshwater wetlands, requires a permit from this Program and would require notarized authorization from the landowner(s) of the property within which freshwater wetlands will be directly altered as a result of a proposed project that expressly authorizes you, the applicant, to apply for the proposed alterations in freshwater wetlands on property owned by others. Unauthorized alterations to freshwater wetlands are subject to enforcement action.

Enclosed please find one (1) copy of your site plans stamped REVIEWED by this Program. Please contact Shawna Holdredge of this Office (telephone: 401-222-6820, ext. 7427) should you have any questions.

Sincerely,

Nancy L. Freeman
