March 30, 2009

Martin S. O'Neill
120 Woodward Avenue
Narragansett, RI 02882

RE: Application No. 08-0346 in reference to the property located:

Approximately 60 feet southwest of the terminus of Woodward Avenue, approximately 1,300 feet west of the intersection of Woodward Avenue and Gibson Avenue, Assessor's Plat Q, Lot 27-20, Narragansett, RI.

Dear Mr. O'Neill:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your Request to verify the delineated edge of freshwater wetlands. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received by the DEM on February 4, 2009.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Department and include at least the following types:

- Swamp
- Perimeter Wetland (that area of land within 50 feet of the edge of any bog, marsh, swamp, or pond)
- River (Crooked Brook)
- Riverbank Wetland (the area of land within 100 feet of the edge of any flowing body of water less than 10 feet wide)
- Floodplain (based on a 100 year frequency storm)

The DEM has completed an inspection and review of the wetland edges delineated by you on-site. It is our determination that the wetland edges delineated on-site are accurate. These wetland edges have been shown on the site plan submitted with your application and are referenced as WF-A2 through WF-A9.

Please note that this letter does not represent a verification of the exact locations of the River, Riverbank Wetland and Floodplain as illustrated on the submitted site plans and present on-site.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to Section 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules) a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands.

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with Rule 8.03(H) of the Rules, this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue.

Please contact Jane Kelly of this Office telephone: (401-222-6820, ext. 7420) should you have any questions regarding this letter.

Sincerely,

Martin D. Wencek, Permitting Supervisor
Office of Water Resources
Freshwater Wetlands Program
