Wakefield, RI 02879

Re: Application No. 09-0187 in reference to the location below:

Approximately 100 feet east of Sand Trail Road (at 601 Sand Trail), near Utility Pole No. 1, and approximately 210 feet south of its intersection with Worden's Pond Road, Assessor's Plat 59-2, Lot 4, South Kingstown, RI

Dear Mr. Main:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program, ("Program") has completed its review of your proposed construction of a one-bedroom addition, deck, and Onsite Wastewater Treatment System as illustrated and detailed on site plans submitted with your application. The site plans referenced by this letter and on file with this Program were received on July 29, 2009.

Our inspection reveals that freshwater wetlands regulated by the DEM are present on the subject property. Review of your proposed project, however, reveals that this project does not represent an alteration to these freshwater wetlands. It is our determination therefore that a permit for this project pursuant to the Freshwater Wetland Act (Rhode Island General Law Section 2-1-18 *et seq.*) or the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act is not required. This Determination is specific to the proposed site alterations illustrated and detailed on site plans on file with this Program and is further predicated on the following:

1. Adequate measures are employed during and after site alterations to control soil erosion and to prevent any sediment from such erosion being deposited in any freshwater wetlands. You should consult the Rhode Island Soil Erosion and Sediment Control Handbook for appropriate methods to control erosion and prevent sediment from leaving your project site.
2. This determination does not authorize you to modify your project in such a way as to result in the following:
 - a. An increase in the rate and/or volume of surface water runoff flowing into, or draining or diverting from these wetlands; or
 - b. A diversion of groundwater into or away from these wetlands; or
 - c. A modification to the quality of water reaching these wetlands, which could change their natural character.

- 3. This Program has made a specific revision to the reviewed site plan. Specifically the limit of disturbance has been designated as required, and the location of erosion and sedimentation controls has been revised to allow adequate space for all proposed work. This revision is clearly marked in red on the reviewed plan. This project must take place in compliance with this revision.

Please note that this Determination is specific to this proposed project as illustrated on the reviewed site plans, is valid for a limited period of four (4) years from the date of issue, and does not remove your obligation to obtain any local, state or federal approvals or permits required by ordinance or law.

Kindly be advised that this determination is not equivalent to a determination of the type or extent of freshwater wetlands on the subject property. Should you wish to obtain such verification, you may submit an application in accordance with Rule 8.03.

Modification to your project, which would result in an alteration or allowing your project to result in an alteration to freshwater wetlands, requires a permit from this Program. Unauthorized alterations to freshwater wetlands are subject to enforcement action.

Enclosed please find one (1) copy of your site plans stamped REVIEWED by this Program. Please contact Kate McPherson of this Office (telephone: 401-222-6820, ext. 7732) should you have any questions.

Sincerely,

Charles A. Horbert, Permitting Supervisor
 Freshwater Wetlands Program
