Insignificant Alteration – Permit

Re: Application No. 10-0115 in reference to the location below:

Approximately 200 feet north of the terminus of Blossom Way, and approximately 400 feet west of the intersection of Frank Low Street and Congdon Street, Assessor's Plat Q, Lot 62, Narragansett, RI

Dear Mr. Deslandes:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request for Preliminary Determination** application. This review included a site inspection of the above referenced property ("subject property") and an evaluation of the proposed construction of two single-family residences with gravel driveways, access to municipal sewer and water, and recreational yards with grading and landscaping as illustrated and detailed on site plans submitted with your application. These site plans were received on June 4, 2010.

Our observations of the subject property, review of the site plans and evaluation of the proposed project reveals that alterations of freshwater wetlands are proposed. However, pursuant to Rule 9.00 of the Rules and Regulations Governing the Administration and Enforcement of the Fresh Water Wetlands Act (Rules), this project may be permitted as an **insignificant alteration** to freshwater wetlands under the following terms and conditions:

Terms and Conditions for Application No. 10-0115:

1. This letter is the DEM's permit for this project under the R.I. Fresh Water Wetlands Act, Rhode Island General Laws (RIGL) Section 2-1-18 et seq.
2. This permit is specifically limited to the project, site alterations and limits of disturbance as detailed on the site plans submitted with your application and received by the DEM on June 4, 2010. A copy of the site plans stamped approved by the DEM is enclosed. Changes or revisions to the project which would alter freshwater wetlands are not authorized without a permit from the DEM.
3. Where the terms and conditions of the permit conflict with the approved site plans, these terms and conditions shall be deemed to supersede the site plans.
4. You must notify this Program in writing immediately prior to the commencement of site alterations and upon completion of the project.

5. A copy of the stamped approved site plans and a copy of this permit must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this permit and the stamped approved plans must be made available for review by any DEM or Town representative upon request.
6. Within ten (10) days of the receipt of this permit, you must record this permit in the land evidence records of the Town of Narragansett and supply this Program with written documentation obtained from the Town showing this permit was recorded.
7. The effective date of this permit is the date this letter was issued. This permit expires four (4) years from the date of issue unless renewed pursuant to the Rules.
8. Any material utilized in this project must be clean and free of matter that could pollute any freshwater wetland.
9. Prior to commencement of site alterations, you shall erect or post a sign resistant to the weather and at least twelve (12) inches wide and eighteen (18) inches long, which boldly identifies the initials "DEM" and the application number of this permit. This sign must be maintained at the site in a conspicuous location until such time that the project is complete.
10. Temporary erosion and sediment controls detailed or described on the approved site plans shall be properly installed at the site prior to or commensurate with site alterations. Such controls shall be properly maintained, replaced, supplemented, or modified as necessary throughout the life of this project to minimize soil erosion and to prevent sediment from being deposited in any wetlands not subject to disturbance under this permit.
11. Also prior to commencement of any site alterations, permanent buffer zone markers must be installed along the limit of disturbance at the locations indicated in red ink on the approved site plans, in order to provide permanent reference points on site that are clear to present and future property owners. Acceptable permanent type markers include 4" x 4" pressure treated timber posts, galvanized fence posts with cap, or granite or concrete bounds. Markers must extend a minimum 24" above grade. A permanent-type tag or sign labeled "RIDEM Buffer Zone" must be placed on each marker. A permanent-type fence at least 24" tall placed along the limits of disturbance and similarly labeled may be substituted where desired. **No alterations of any kind are permitted beyond these markers without first obtaining the necessary permit from this Program.**
12. Upon permanent stabilization of all disturbed soils, temporary erosion and/or sediment controls consisting of silt fencing, if used, must be removed.
13. You are obligated to install, utilize and follow all best management practices detailed or described on the approved site plans in the construction of the project to minimize or prevent adverse impacts to any adjacent freshwater wetlands and the functions and values provided by such wetlands.
14. This Program has made specific revisions to the approved site plans. Specifically, the limit of disturbance has been revised on subplot 2 to allow a realistic amount of distance between the limit of disturbance and the residence for construction and maintenance. Buffer zone marker locations have also been specified on the site plan. These revisions are clearly marked in red on the approved plans. This project must take place in compliance with these revisions.

Pursuant to the provisions in Rule 7.09 and Rule 11.04, as applicable, any properly recorded and valid permit is automatically transferred to the new owner upon sale of the property

Kindly be advised that this permit is not equivalent to a determination of the type or extent of freshwater wetlands on the subject property. Should you wish to obtain such verification, you may submit an application in accordance with the Rules.

You are required to comply with the terms and conditions of this permit and to carry out this project in compliance with the Rules at all times. Failure to do so may result in an enforcement action by this Department.

In permitting the proposed alterations, the DEM assumes no responsibility for damages resulting from faulty design or construction.

This permit does not remove your obligation to obtain any local, state, or federal approvals or permits required by ordinance or law and does not relieve you from any duties owed to adjacent landowners with specific reference to any changes in drainage.

Please contact Kate McPherson of this office (telephone: 401-222-6820, ext. 7732) should you have any questions regarding this letter.

Sincerely,

Charles A. Horbert, Permitting Supervisor

Re: Application No. 10-0115 in reference to the location below:

Approximately 200 feet north of the terminus of Blossom Way, and approximately 400 feet west of the intersection of Frank Low Street and Congdon Street, Assessor's Plat Q, Lot 62, Narragansett, RI

Dear Mr. Deslandes:

The Department of Environmental Management's ("DEM") Freshwater Wetlands ("Program") has reviewed your **Application for Permit Modification** for the proposed revisions to Robinson Street and additional culverts and other revisions at the above-referenced site pursuant to Rule 11.03 of the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules). It is our determination that a revised permit under this application may **not** be issued at this time for the following reasons:

- The proposed revised project revised the limit of disturbance such that it was increased beyond the limit of disturbance previously permitted and involves additional impacts to freshwater wetlands not previously reviewed by the Department in the originally approved project, specifically related to stormwater impacts. Furthermore, the project now expands to other properties (Town of Narragansett).

Therefore, your revised project will require a new application. In addition, a stormwater construction application is required for the new impervious area and the Town would need to be a co-applicant. To continue review as a permit modification, new work off-site would need to be removed and submitted under as a separate application.

Upon receipt of your new application, this Program will commence processing in accordance with the Rules.

If you have any questions regarding this letter, or with respect to any of the above-noted review comments, please feel free to contact me directly at (401) 222-4700, ext. 7408 or email at nancy.freeman@dem.ri.gov.

Sincerely,

Nancy L. Freeman, Principal Environmental Scientist
Freshwater Wetlands Program
Office of Water Resources
