Cumberland, RI 02864

Re: Application No. 12-0067 in reference to the location below:

Approximately 450 feet north of Log Road near Utility Pole No. 117 and approximately 4,500 feet southeast of its intersection with Indigo Farm Road, Assessor's Plat 50, Lot 43, Smithfield, RI

Dear Mr. Cabral:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request to verify the delineated edge of freshwater wetlands**. This review included an inspection of the above referenced property ("subject property") as described by the most recently revised site plans submitted in response to our comments, and received on January 30, 2013.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Department and include at least the following types:

- Swamp ("A", "B", "F" and "G" series flags)
- Perimeter wetland (that area of land within 50 feet of the edge of any bog, marsh, swamp, or pond)
- Forested wetlands ("C", "D" and "E" series flags)
- Special aquatic site (within the forested wetlands delineated by "C" and "E" series flags)

The DEM has completed an inspection and review of the wetland edges delineated by you on-site. **As requested by you**, the Program has inspected and verified **only** the wetland limits within Assessor's Plat 50, lots 93 through 103 (subdivision lots 1 through 11). It is our determination that the wetland edges delineated on-site are substantially accurate. These wetland edges have been shown on the site plan submitted with your application and are referenced as:

- Flags A14, B23, B24, and G9 through G14.
- All limits of perimeter wetland associated with off-site flags have been determined to be adequately delineated, with the one exception noted below.

Corrections and/or modifications to the delineated edge are required, however, which include the following:

- Note that duplicate numbers are present in the G series. From the south the G series counts up to G17, then on Lot 98 the numbers revert back to G-8 and count up to G16. The northern set of G-9 through G-14 flags, which are on property owned by the applicant, were accurate.
- The northernmost 50-foot perimeter wetland marker placed on lot 99 is only 40 feet from the wetland edge. Please move this marker east 10 feet.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to Section 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules) a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands

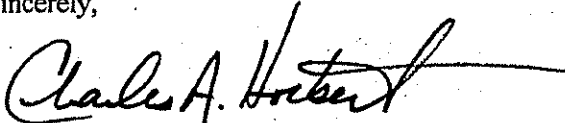

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with Rule 8.03(H) of the Rules, this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue.

Please contact Kate McPherson of this Office telephone: (401-222-6820, ext. 7732) should you have any questions regarding this letter.

Sincerely,

Charles A. Horbert, Permitting Supervisor
Office of Water Resources
Freshwater Wetlands Program
