October 16, 2012

Daniel Devine  
195 Rockwood Lane  
Wakefield, RI 02879

Re: Application No. 12-0100 in reference to the location below:

Approximately 400 feet southwest of Rockwood Lane (House No. 195), and approximately 2,275 feet south of its intersection with Curtis Corner Road, Assessor's Map 54, Lot 29, Utility Pole No. 14, South Kingstown, RI

Dear Mr. Devine:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request to verify the delineated edge of freshwater wetlands**. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received on June 7, 2012.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Program and include at least the following types:

- Swamp
- 50-foot perimeter wetland (that area of land within 50 feet of the edge of any bog, marsh, swamp, or pond)

The DEM has completed an inspection and review of the wetland edges delineated by you on-site. It is our determination that the wetland edge delineated on-site is substantially accurate. This wetland edge has been shown on the site plan submitted with your application and specifically includes the portion of the wetland edge flagged with wetland flags 1 through 16. The wetland edge flags delineate the edge of a swamp.

Note that one minor modification to the delineated edge is required as follows:

- Move Flag No. 12 fifteen feet (15') northeast

Please note, as requested, this is **only a partial wetland edge verification**. Only a portion of the swamp edge has been flagged and verified. The remaining edge has not been reviewed, and there are additional wetlands present on site including a Special Aquatic Site within a wetland in the southeastern portion of the property. Therefore, you should **not infer that any verification of wetland edges carried out by this Department to date represents a determination that this is the extent of all wetlands on your property**. The Department has **verified only those edges delineated and shown by you on-site and on site plans submitted with your application and as qualified in this**

letter. Should you wish to verify the edge of the additional wetlands, an additional application will be required.

**This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to Section 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules) a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands.**

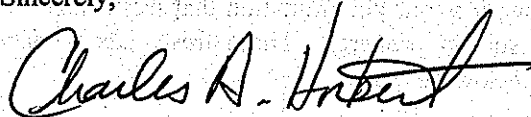

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property that may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with Rule 8.03(H) of the Rules, this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue.

Please contact me (401-222-6820, ext. 7402) should you have any questions regarding this letter.

Sincerely,

Charles A. Horbert, Program Supervisor  
Office of Water Resources  
Freshwater Wetland Program
