November 14, 2012

John Joyal
295 Rhode Island Avenue
Woonsocket, RI 02895

RE: Application No. 12-0167 in reference to the property and project located:

Approximately 250 feet northeast of Mattity Road; by utility pole no. 50; approximately 1,200 feet northeast of the intersection of Nichols and Log Roads; Assessor's Plat 10, Lot 151, North Smithfield, RI.

Dear Mr. Joyal:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your proposed four bedroom dwelling with Onsite Wastewater Treatment System (OWTS), private well, driveway, rain gardens, dry well, plantings, loam and seed, and yard space for the above referenced property ("subject property") as illustrated and detailed on site plans submitted with your application. The site plans referenced by this letter and on file with this Program were received on October 11, 2012.

Our inspection reveals that freshwater wetlands regulated by the DEM are present on or in close proximity to the subject property. Review of your proposed project, however, reveals that this project does not represent an alteration to these freshwater wetlands. It is our determination therefore that a permit for this project pursuant to the Freshwater Wetland Act (Rhode Island General Law Section 2-1-18 et seq.) or the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act is not required. This Determination of Non-Jurisdiction is specific to the proposed site alterations illustrated and detailed on site plans on file with this Program and is further predicated on the following:

1. Adequate measures are employed during and after site alterations to control soil erosion and to prevent any sediment from such erosion being deposited in any freshwater wetlands. You should consult the Rhode Island Soil Erosion and Sediment Control Handbook for appropriate methods to control erosion and prevent sediment from leaving your project site.
2. This determination does not authorize you to modify your project in such a way as to result in the following:
 - a. An increase in the rate and/or volume of surface water runoff flowing into, or draining or diverting from these wetlands; or
 - b. A diversion of groundwater into or away from these wetlands; or
 - c. A modification to the quality of water reaching these wetlands which could change their natural character.

3. The staked haybales or silt fence and limit of disturbance line illustrated on the reviewed site plans has been extended northeasterly to the depicted property line. This extended limit of disturbance represents the limit of review conducted by the DEM for this proposed project.

Kindly be advised that this determination is not equivalent to a determination of the type or extent of freshwater wetlands on the subject property. Should you wish to obtain such verification, you may submit an application in accordance with Rule 8.03.

Please note that this Determination of Non-Jurisdiction is specific to this proposed project, is valid till July 1, 2017, and does not remove your obligation to obtain any local, state or federal approvals or permits required by ordinance or law.

Modification to your project which would result in an alteration or allowing your project to result in an alteration to freshwater wetlands requires a permit from this Department. Unauthorized alterations to freshwater wetlands are subject to enforcement action.

Enclosed please find one (1) copy of your site plans stamped REVIEWED by this Program. Please contact Daniel Kowal (telephone: 401-222-4700, ext. 7416) should you have any questions.

Sincerely,

Martin D. Wencek, Permitting Supervisor
Freshwater Wetlands Program
Office of Water Resources
