John O'Neill
3102 Mendon Road
Cumberland, RI 02864

Re: Application No. 13-0073 in reference to the location below:

Approximately 360 feet southwest of Mendon Road at 3102 Mendon Road, near Utility Pole No. 218, and approximately 425 feet west of its intersection with New Clark Road, Assessor's Plat 54, Lots 30 & 560, Cumberland, RI

Dear Mr. O'Neill:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request to verify the delineated edge of freshwater wetlands**. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received on May 3, 2013.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Department and include *at least* the following types:

- Forested wetland

The DEM has completed an inspection and review of the wetland edge delineated by you on-site. It is our determination that the wetland edge delineated on-site is substantially accurate. One correction and/or modification to the delineated edge is required, however, which includes the following:

- Move flag A11 southwest 10 feet.

The wetland edge shown on the site plan submitted with your application and verified by this determination is referenced as flags A1 through A13.

Please note that it appears based on the soils maps and aerial imagery that there may be additional unflagged wetlands on this property. Only the wetland edge delineated on the site plan was inspected during site inspection. Therefore, you should not infer that any verification of wetland edges carried out by this Department to date represents a determination that this is the extent of all wetlands on your property. **The Department has verified only those edges delineated and shown by you on-site and on site plans submitted with your application and as qualified in this letter.** Should you wish to verify the edge of these additional wetlands, an additional application will be required.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to Section 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules) a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands

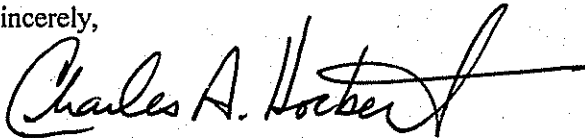

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with Rule 8.03(H) of the Rules, this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue.

Please contact Kate McPherson of this Office telephone: (401-222-6820, ext. 7732) should you have any questions regarding this letter.

Sincerely,

Charles A. Horbert, Program Supervisor
Office of Water Resources
Freshwater Wetlands Program
