Re: Application No. 15-0180 in reference to the location below:

Approximately 180 feet west of Putnam Pike (Building No.1116), opposite Utility Pole No. 343, approximately 100 feet south of the intersection of Putnam Pike and Dorr Drive, Assessor's Plat 10D, Lot 9, Glocester, RI.

Dear Ms. Marley-Clift:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request to verify the delineated edge of freshwater wetlands**. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received on August 19, 2015.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Department and include at least the following types:

- swamp
- perimeter wetland (that area of land within 50 feet of the edge of any bog, marsh, swamp, or pond)
- 2 streams
- riverbank wetlands (the area of land within 100 feet of the edge of any flowing body of water less than 10 feet wide)
- area subject to storm flowage
- floodplain (based on a 100 year frequency storm)

The DEM has completed an inspection and review of the wetland edges delineated by you on-site. It is our determination that:

Those wetland edges delineated on-site are substantially accurate. Corrections and/or modifications to the delineated edge are required, however, which include the following:

- The stream depicted on the plan continues northwest of flag A9 and is present south of wetland flags A5 through A9 within the swamp. Future submittals must show this stream and a revised 100 foot riverbank wetland (associated with the additional stream noted above).

Please note that our inspection of the subject property has revealed the presence of other freshwater wetlands edges (specifically, the edges of the depicted upland islands) not specifically delineated by you. Therefore, you should not infer that any verification of wetland edges carried out by this Department to date represents a determination that this is the exact or extent of all wetlands on your property. **The Department has verified only those edges delineated and shown by you on-site and on site plans submitted with your application and as qualified in this letter.** Should you wish to verify the edge of these additional wetlands, an additional application will be required.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to Section 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act (Rules) a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands

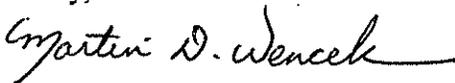

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with Rule 8.03(H) of the Rules, this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue.

Please contact Andrew Charpentier of this Office telephone: (401-222-6820, ext.7414) should you have any questions regarding this letter.

Sincerely,

Martin D. Wencek, Permitting Supervisor
Office of Water Resources
Freshwater Wetlands Program
