Norman Beretta
869 Smithfield Ave.
Lincoln, RI 02865

RE: Application No. 18-0209 in reference to the property and proposed project located:

Approximately 55 feet northwest of Scott Road, near utility pole no. 100-84; approximately 93 northwest of the intersection of Theater and Scott Roads; Assessor's Plat 66, Lots 90 & 91, Cumberland, RI.

Dear Mr. Beretta:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your proposed construction of a two bedroom dwelling with drive, On-site Wastewater Treatment System (OWTS), a private well and water line, a rain garden, grading, a retaining wall, and landscape plantings for the above referenced property ("subject property") as illustrated and detailed on site plans submitted with your application. The site plans referenced by this letter and on file with this Program were received on August 8, 2018.

Our inspection reveals that freshwater wetlands regulated by the DEM are present on or in close proximity to the subject property. Review of your proposed project, however, reveals that this project does not represent an alteration to these freshwater wetlands. It is our determination therefore that a permit for this project pursuant to the Freshwater Wetland Act (Rhode Island General Law Section 2-1-18 et seq.) or the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act is not required. This Determination of Non-Jurisdiction is **specific to the proposed site alterations illustrated and detailed on site plans on file with this Program** and is further predicated on the following:

1. Adequate measures are employed during and after site alterations to control soil erosion and to prevent any sediment from such erosion being deposited in any freshwater wetlands. You should consult the Rhode Island Soil Erosion and Sediment Control Handbook for appropriate methods to control erosion and prevent sediment from leaving your project site.
2. This determination does not authorize you to modify your project in such a way as to result in the following:
 - a. An increase in the rate and/or volume of surface water runoff flowing into, or draining or diverting from these wetlands; or
 - b. A diversion of groundwater into or away from these wetlands; or
 - c. A modification to the quality of water reaching these wetlands which could change their natural character.

3. This Program has made a specific revision to the reviewed site plan. This revision is clearly marked in red on the reviewed plan. This project must take place in compliance with this revision. Specifically, the limit of disturbance/silt fence has been modified to enclose all proposed work associated with the proposed project.

Please note that this Determination of Non-Jurisdiction is specific to this proposed project as illustrated on the reviewed site plans, is valid till October 12, 2022, and does not remove your obligation to obtain any local, state or federal approvals or permits required by ordinance or law.

Kindly be advised that this permit is not equivalent to a verification of the type or extent of freshwater wetlands on site. Should you wish to have the types and extent of freshwater wetlands verified, you may submit the appropriate application in accordance with Rule 8.03.

In authorizing the proposed alterations, the DEM assumes no responsibility for damages resulting from faulty design or construction.

Any modification to your project that would result in an alteration to freshwater wetlands or allowing your project to result in an alteration to freshwater wetlands requires a permit from this Program. Unauthorized alterations to freshwater wetlands are subject to enforcement action.

Enclosed please find one (1) copy of your site plans stamped REVIEWED by this Program. Please contact Daniel Kowal (telephone: 401-222-4700, ext. 7416) should you have any questions.

Sincerely,

Martin D. Wencek, Permitting Supervisor
Freshwater Wetlands Program
