250' from array to the street. NE
Scale: 1/2" = 50'

Trench run is approximately 200' from the array to the house for power attachment. It requires a 2' narrow trench, line installed and covered with a layer of sand, then soil.

Power connection from house to street is above ground and wires strung to utility poles to the street. No underground access is required. Utility poles already in place. Images attached.
