Insignificant Alteration – Permit

Re: Wetland Application No. 19-0285; RIPDES File No. RIR101966 in reference to the location below:

South of the terminus of Elder Avenue, continuing approximately 900 feet south to the Citizens Bank parking lot, Assessor's Plat 409 Block 9 Lots 21 and 2, East Providence, RI.

Dear Mr. Coutu:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Request for Preliminary Determination** application. This review included a site inspection of the above referenced property ("subject property") and an evaluation of the proposed installation of a public supply waterline including site grading and restoration plantings as illustrated and detailed on site plans submitted with your application. These site plans were received by the DEM on February 27, 2020.

Our observations of the subject property, review of the site plans and evaluation of the proposed project reveals that alterations of freshwater wetlands are proposed. However, pursuant to 250-RICR-150-15-1.9 of the Rules and Regulations Governing the Administration and Enforcement of the Fresh Water Wetlands Act, 250-RICR-150-15-1 (Rules), this project may be permitted as an **insignificant alteration** to freshwater wetlands under the following terms and conditions:

Terms and Conditions for Wetlands Application No. 19-0285; RIPDES No. RIR101966:

1. This letter is the DEM's permit for this project under the R.I. Fresh Water Wetlands Act, R.I. Gen. Laws § 2-1-18 et seq.
2. This determination also includes your final authorization to discharge storm water associated with construction activity under the **2018 RIDPES General Permit for Stormwater Discharge During Construction Activity ("CGP")**. For future references and inquiry, your permit authorization number is **RIPDES No. RIR101966**.
3. This permit is specifically limited to the project, site alterations, and limits of disturbance as detailed on the site plans submitted with your application and received by the DEM on February 28, 2020. A copy of the site plans stamped approved by the DEM is enclosed. Changes or revisions to the project that would alter freshwater wetlands are not authorized without a permit from the DEM.

4. Where the terms and conditions of the permit conflict with the approved site plans, these terms and conditions shall be deemed to supersede the site plans.
5. You must notify this Program in writing of the anticipated start date, and of your contractor's contact information, by submitting the Notice of Start of Construction Form prior to commencement of any permitted site alterations or construction activity. You must also notify this Program in writing upon completion of the project, including submittal of the Notice of Termination Form. The Start of Construction Form and the Notice of Termination can be found on the webpage: dem.ri.gov/stormwaterconstruction
6. A copy of the stamped approved site plans and a copy of this permit must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this permit and the stamped approved plans must be made available for review by any DEM or City/Town representative upon request.
7. The effective date of this permit is the date this letter was issued. This permit expires four (4) years from the date of this letter unless renewed pursuant to the Rules.
8. Any material utilized in this project must be clean and free of matter that could pollute any freshwater wetland.
9. Prior to commencement of site alterations, you shall erect or post a sign resistant to the weather and at least twelve (12) inches wide and eighteen (18) inches long, which boldly identifies the initials "DEM" and the application number of this permit. This sign must be maintained at the site in a conspicuous location until such time that the project is complete.
10. Both the owner and the contractor retained to undertake the construction activity are required to comply with all terms and conditions of the CGP. This includes maintaining the Soil Erosion and Sediment Control (SESC) Plan, performing the required inspections and maintenance of the selected Best Management Practices (BMPs), and retaining inspection records. Further information on the requirements of the CGP is available at:
<http://www.dem.ri.gov/programs/benviron/water/permits/swcoord/pdf/cpg092618.pdf>.
11. Temporary erosion and sediment controls detailed or described on the approved site plans shall be properly installed at the site prior to or commensurate with site alterations. Such controls shall be properly maintained, replaced, supplemented, or modified as necessary throughout the life of this project to minimize soil erosion and to prevent sediment from being deposited in any wetlands not subject to disturbance under this permit.
12. Upon permanent stabilization of all disturbed soils, temporary erosion and/or sediment controls must be removed.
13. You are responsible for the proper installation, operation, maintenance and stability of any mitigative features, stormwater treatment facilities, and systems of treatment and control that are installed or used in compliance with this permit to prevent harm to adjacent wetlands until documentation is provided that this responsibility has been assigned to another entity.

14. You are obligated to install, utilize and follow all best management practices detailed or described on the approved site plans in the construction of the project to minimize or prevent adverse impacts to any adjacent freshwater wetlands and the functions and values provided by such wetlands.
15. All construction activities involving soil disturbances within watercourses must be limited to the low flow period (*i.e.*, the period from July 1 to October 31 of any calendar year). Soil disturbance in these watercourses must temporarily cease in the event of any abnormally high stormwater runoff event during the low flow period.
16. All plantings of shrubs, trees or other forms of vegetation as shown or detailed on the approved plans, or detailed in this permit, must be installed as soon as possible after completion of final grading; weather and season permitting.
17. **Please note that the Limit of Disturbance for this project shall be consistent with the placement of the compost filter sock as illustrated on the approved site plans. Where the filter sock is not shown on the approved site plans, all work must take place within the 30 foot temporary construction easement that has been identified on the plans.**

Pursuant to the provisions in 250-RICR-150-15-1.7(A)(9) and 250-RICR-150-15-1.11(D), as applicable, any properly recorded and valid permit is automatically transferred to the new owner upon sale of the property.

Please be aware that the RIDEM's Rules and Regulations Governing the Establishment of Various Fees (250-RICR-30-00-1) require that RIPDES CGP permit holders to pay an Annual Fee of \$100.00. An invoice will be sent to the owner on record in May/June of each year if the construction was still active as of December 31st of the previous year. The owner will be responsible for the Annual Fee until the construction activity has been completed, the site has been properly stabilized, and a completed Notice of Termination (NOT) has been received by the RIPDES Program.

This review has resulted in the determination that there are no federal jurisdictional wetlands on the subject property and as a result, does not require a Corps permit for the project as proposed.

You are required to comply with the terms and conditions of this permit and to carry out this project in compliance with the Rules at all times. Failure to do so may result in an enforcement action by this Department.

In permitting the proposed alterations, the DEM assumes no responsibility for damages resulting from faulty design or construction.

Kindly be advised that this permit is not equivalent to a verification of the type or extent of freshwater wetlands on site. Should you wish to have the types and extent of freshwater wetlands verified, you may submit the appropriate application in accordance with 250-RICR-150-15-1.8(C).

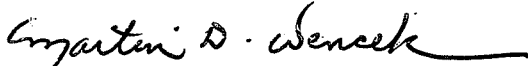

This permit does not remove your obligation to obtain any local, state, or federal approvals or permits required by ordinance or law and does not relieve you from any duties owed to adjacent landowners with specific reference to any changes in drainage.

Application No. 19-0285

Re: Wetlands Application No. 19-0285 in reference to the location below:

Between approximately the terminus of Elder Avenue, south to the Citizens Bank parking lot, along the proposed waterline in East Providence, RI.

Dear Mr. Coutu:

Please be advised that the DEM's Freshwater Wetlands Program is unable to commence our review of your Request for Preliminary Determination Application at the above-referenced site at this time for the following reason:

1. Work is being conducted in freshwater wetlands on property owned by others (Citizens Bank). If the applicant is a government agency, the agency must demonstrate that it owns the property or holds an easement of sufficient scope to cover the proposed project (or has the requisite powers of condemnation) pursuant to Rule 250-RICR-150-15-1.7(A)(2)(d). Please provide the appropriate documentation. If there is not yet an easement, and no powers of condemnation, written notarized letters of authorization must be obtained from landowners of properties within which freshwater wetlands will be directly altered as a result of the proposed projects that expressly authorizes the applicant (City of East Providence) to apply to RIDEM Freshwater Wetlands Program for alterations as depicted on the site plans (pursuant to Rule 250-RICR-150-15-1.7(A)(2)(c)).
2. Please provide the Plat and Lot numbers for the Citizens Bank Lot and the Plat and Lot owned by East Providence where the majority of the waterline is to be installed through the woods and wetlands.

Upon receipt of the information requested above, the Program will commence review of your Application to Alter. Please reference the application number provided above in all communications regarding your application. If you have any questions, please call me at (401) 222-6820, ext. 7408.

Sincerely,

Nancy L. Freeman, Acting Principal Environmental Scientist
Office of Water Resources
Freshwater Wetlands Program
