OFFICE OF WATER RESOURCES
235 Promenade Street
Providence, Rhode Island 02908

February 14, 2020

Brad Turchetta
360 Kent Drive
East Greenwich, RI 02818

RE: Application No. 19-0316 in reference to the location below:

Located at the northern terminus of Kent Drive, approximately 300 feet north of its intersection with Silo Street, Assessor's Plat 10, Lot 361, East Greenwich, RI.

Dear Mr. Turchetta:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your Request to verify the delineated edge of freshwater wetlands. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received on November 5, 2019.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Department and include, but are not limited to, at least the following types:

- Swamp
- Perimeter Wetland (that area of land within 50 feet of the edge of any bog, marsh, swamp, or pond)
- Two (2) Rivers
- Riverbank Wetlands (that area of land within two hundred feet (200') feet of the edge of any flowing body of water having a width of ten feet (10') or more, and that area of land within one hundred feet (100') of the edge of any flowing body of water having a width of less than ten feet (10') during normal flow)
- Flood plain

The DEM has completed an inspection and review of the wetland edges delineated by you on-site. It is our determination that those wetland edges delineated on-site are substantially accurate. Corrections and/or modifications to the delineated edge are required, however, which include the following:

1. The river location as depicted on the site plan to be north of the subject property could not be verified. Site measurement indicate that this river is approximately 100 feet north of wetland flag A26, but the site plan depicts this distance to be 140 feet which appears to be in error.
2. Also note that a second river, which requires a 200-foot riverbank wetland, is present approximately 70 feet north of the northeast property corner.

Please note that our inspection of the subject property has revealed the presence of other freshwater wetlands not specifically delineated by you. Therefore, you should not infer that any verification of wetland edges carried out by this Department to date represents a determination that this is the extent of all wetlands on your property. The

Telephone 401.222.4700 | www.dem.ri.gov | Rhode Island Relay 711

Department has verified only those edges delineated and shown by you on-site and on site plans submitted with your application and as qualified in this letter. Should you wish to verify the edge of these additional wetlands, an additional application will be required.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to R.I. Gen. Laws § 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act, 250-RICR150-15-1, a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands.

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with 250-RICR-150-15-1.8(C)(8), this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue.

You are hereby advised that on July 10, 2015, significant revisions to the RI Freshwater Wetlands Act (R.I. Gen. Laws § 2-1-18 et. seq.) were signed into law. These revisions modify, among other things, the "jurisdictional areas" recognized by the State of Rhode Island. The Department is currently in the process of amending the Rules. If you are contemplating a project on your property, and submit the application prior to the promulgation of the revised Rules, you can expect the wetlands jurisdictional areas to correspond as described in this verification letter.

Any application submitted after promulgation of the Rules will be expected to conform to the then existing and duly promulgated Rules. While these changes will not affect the location of flagged wetland edges as verified in this letter, they may affect how activities located in adjacent jurisdictional upland areas will be regulated. You are advised, in the meantime, to monitor the rulemaking process, which will include opportunities for public input and comment.

Please contact Andrew Charpentier of this Office telephone: (401-222-4700, ext.7414) should you have any questions regarding this letter.

Sincerely,

Martin D. Wencek, Program Supervisor
