**REVISED PERMIT**

Re: Application No. 20-0025 in reference to the location below:

On Broncos Highway from approximately 500 feet west to approximately 400 feet west of the intersection of Douglas Turnpike (RI Route 7) and Broncos Highway, State Highway Plat Number 1409, Burrillville, RI.

Dear Ms. Richardson:

The Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your Application for Permit Modification and has evaluated your request to extend the low-flow time limit for in-water work as described in the cover letter submitted with your application. The complete application was received by the DEM on April 29, 2022.

Based upon the Program's evaluation of the revised project and pursuant to 250-RICR-150-15-1.11(C) of the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act, 250-RICR-150-15-1, it is the Program's determination that a revised permit for a modified project timeline may be issued for a portion of the time frame requested. This modification shall allow in-water work to commence on June 15, 2022 under the following terms and conditions:

1. This letter is the DEM's revised permit for this project under the R.I. Fresh Water Wetlands Act, R.I. Gen Laws. § 2-1-18 et seq.
2. This revised permit is still specifically limited to the project, site alterations and limits of disturbance as detailed on the site plans submitted with your original application and received by the DEM on January 22, 2020. Changes or revisions to the project that would alter freshwater wetlands are not authorized without a permit from the DEM.
3. Where the terms and conditions of the revised permit conflict with the approved site plans, these terms and conditions shall be deemed to supersede the site plans.
4. A copy of the previously stamped approved site plans and a copy of this revised permit must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this revised permit and the stamped approved plans must be made available for review by any DEM or Town representative upon request.
5. This revised permit expires four (4) years from the date of issue of the original letter of June 2, 2020, (copy enclosed) unless renewed pursuant to 250-RICR-150-15-1.9(D)(5).

Except as authorized in this revised permit, all terms and conditions previously specified in the Program's permit dated June 2, 2020 remain in effect.

You are required to comply with the terms and conditions of this revised permit and to carry out this project in compliance with 250-RICR-150-15-1 at all times. Failure to do so may result in an enforcement action by the Program.

In permitting the proposed alterations, the DEM assumes no responsibility for damages resulting from faulty design or construction.

This revised permit does not remove your obligation to obtain any local, state, or federal approvals or permits required by ordinance or law and does not relieve you from any duties owed to adjacent landowners with specific reference to any changes in drainage.

Please contact me at this office at (telephone: 401-222-6820 ext. 2777403) should you have any questions regarding this letter.

Sincerely,

Martin D. Wencek, Program Supervisor  
Freshwater Wetlands Program  
Office of Water Resources
