North Providence, RI 02904

RE: Application No. 21-0247 in reference to the property located:

Approximately 50 feet south of Baltimore Avenue and approximately 235 feet west of its intersection with Newport Row, between Utility Pole Nos. 12 and 13, Assessor's Plat T, Lot 453, Narragansett, RI.

Dear Applicants:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your Request to verify the delineated edge of freshwater wetlands. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received on September 8, 2021.

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands are regulated by this Department and include, but are not limited to, at least the following types:

- Swamp
- Perimeter Wetland (that area of land within fifty feet (50') of the edge of any freshwater wetland consisting in part, or in whole, of a bog, marsh, swamp or pond)
- Stream
- Riverbank Wetland (that area of land within one hundred feet (100') of the edge of any flowing body of water having a width of less than ten feet (10') during normal flow)
- Flood plain

The DEM has completed an inspection and review of the wetland edges delineated by you on-site. It is our determination that the wetland edges delineated on-site are accurate. These wetland edges have been shown on the site plan submitted with your application and are referenced as Flag Nos. A2 through A9 and B1 through B7. Please note that A1 was not reviewed as part of this verification because it is located off-site.

Please note that you should not infer that any verification of wetland edges carried out by this Department to date represents a determination that this is the extent of all wetlands on your property. The Department has verified only those edges delineated and shown by you on-site and on the site plans submitted with your application and as qualified in this letter.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to R.I. Gen. Laws § 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act, 250-RICR-150-15-1, a

permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands.

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with 250-RICR-150-15-1.8(C)(8), this verification of the delineated edge of freshwater wetlands is valid for a limited period of four (4) years from the date of issue. You are hereby advised that on July 10, 2015, significant revisions to the RI Freshwater Wetlands Act (R.I. Gen. Laws § 2-1-18 et. seq.) were signed into law. These revisions modify, among other things, the "jurisdictional areas" recognized by the State of Rhode Island. DEM has finalized adoption of revised Freshwater Wetlands Rules (250-RICR-150-15-2) which will go into effect on **January 15, 2022**. Until that date, the existing Freshwater Wetland Rules (250-RICR-150-15-1) remain in place.

If you are contemplating a project on your property and submit the application prior January 15, 2022, you can expect the wetlands jurisdictional areas to correspond as described in this verification letter. Any application submitted after January 15, 2022 will be expected to conform to the then existing and duly promulgated Rules. While these changes will not affect the location of flagged wetland edges as verified in this letter, they may affect how activities located in adjacent jurisdictional upland areas will be regulated.

Also please be advised that any clearing of vegetation within jurisdictional wetlands for test pipes must be allowed to revert back to its natural condition without further disturbance.

Please contact Jessica Lord of this Office telephone: (401-222-6820, ext. 2777416) should you have any questions regarding this letter.

Sincerely,

Nancy L. Freeman, Principal Environmental Scientist  
Office of Water Resources
