## Garden Village Replacement Dock

An existing concrete pier, approximately 9' wide, 16' long, 40" deep ending at water's edge formerly anchored a dock. A hinged dock ramp will be connected to the concrete with wedge anchors.

A Floating dock and ramp will attach to the existing concrete pier (center of photo at water's edge). The pier is over 100 feet from adjacent properties. A new wooden dock will extend approximate 20 feet from the shoreline. It will be built according to attached plans using heavy duty components from Ninigret Marine (catalog attached) according to assembly directions from Permafloat (attached).
