OFFICE OF WATER RESOURCES

235 Promenade Street
Providence, Rhode Island 02908

October 30, 2023

Robert Woods
300 Olney Keach Road
Pascoag, RI, 02859

RE: Application No. **23-0202** in reference to the property located:

Approximately 455 feet east of Olney Keach Road, Opposite Utility Pole No. 22, and approximately 3,500 feet south of its intersection with Jackson Schoolhouse Road, Assessor's Plat 206, Lot 7, Burrillville, RI.

Dear Mr. Woods:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your Request to verify freshwater wetland edges. This review included an inspection of the above referenced property ("subject property") as described by the site plans submitted with your application and received on September 15, 2023.

Per Rule 250-RICR-150-15-3.23, the **Statewide Buffer Zone Designation**, your property falls within:

- River Protection Region 1

Based upon the Program's observations and review, it is our determination that freshwater wetlands are present on or are in close proximity to the subject property. These freshwater wetlands and other jurisdictional areas are regulated by this Department and include, but are not limited to, at least the following types:

Jurisdictional Areas:

- Freshwater Wetlands (see below)
- Buffer: All areas of undeveloped vegetated land adjacent to a freshwater wetland that is to be retained in its natural undisturbed condition or is to be created to resemble a naturally occurring vegetated area. For the purpose of defining buffer in these Rules, "adjacent to" means land area within the buffer zone.
- Contiguous areas that extend one-hundred feet (100') from the edge of all other freshwater wetlands.

Freshwater Wetlands and associated Statewide Buffer Zone Designation (include at least the following types):

- Swamp, greater than 10 acres and the 75-Foot Buffer Zone.

The DEM has completed an inspection and review of the wetland edges delineated by you on-site and are referenced as Flag Numbers C18, C20, C23, C24, C23dup, and Flag Numbers A36 through A44. It is our determination that those wetland edges delineated on-site are substantially accurate. Corrections and/or modifications to the delineated edge are required, however, which include the following:

Flag C18 should be moved outward, northwest, approximately 12 feet.

Additional flags should be added to the "A" wetland edge:

- **Approximately 24 feet southeast of flag A43, between flags A43 and A44**

- **Approximately 24 feet west of flag A41, between flags A41 and A40**
- **Approximately 16 feet west of flag A37, between flags A37 and A36**

Please note that our inspection of the subject property has revealed the presence of other freshwater wetlands not specifically delineated by you. Therefore, you should not infer that any verification of wetland edges carried out by this Department to date represents a determination that this is the extent of all wetlands or jurisdictional areas on your property. **The Department has verified only those edges delineated and shown by you on-site and on the site plans submitted with your application and as qualified in this letter.** Should you wish to verify the edge of these additional wetlands, a new application will be required.

This letter does not constitute an approval or permit for any proposed project on the subject property. Pursuant to R.I. Gen. Laws § 2-1-21(a) of the Freshwater Wetlands Act and the Rules and Regulations Governing the Administration and Enforcement of the Freshwater Wetlands Act, 250-RICR150-15-3, a permit is required from this Program prior to the commencement of any activity which impacts or alters freshwater wetlands.

This Program assumes that the edges of freshwater wetlands, as flagged or marked on site, have been accurately surveyed and portrayed on site plans submitted in support of your application. This Program makes no guarantee or representation that such survey is accurate.

In addition, you should note that freshwater wetlands are present on this property which may be regulated under Section 404 of the Clean Water Act (Federal Water Pollution Control Act, as amended 33 U.S.C. 1344). Accordingly, a permit may be required from the U.S. Army Corps of Engineers for alteration of these wetland areas.

In accordance with 250-RICR-150-15-3.9.3(H), this verification of the delineated edge of freshwater wetlands is valid for a limited period of five (5) years from the date of issue.

Please contact Lucianna Faraone Coccia of this Office telephone: (401-222-6820, ext. 2777270) should you have any questions regarding this letter.

Sincerely,

Andy Charpentier, Environmental Scientist III
