Freshwater Wetlands Permit

Re: Application No. 24-0078 for the property and project located:

At 94 Wood River Drive, approximately 1300 feet northwest from the intersection of Wood River Drive and Pine Shadows Drive, Assessor's Plat 3B, Lots 1-1 & 2-1, Richmond, RI.

Dear Ms. Pinch:

Kindly be advised that the Department of Environmental Management's ("DEM") Freshwater Wetlands Program ("Program") has completed its review of your **Application for a Freshwater Wetlands Permit** as described in Section 3.11 of the Rules and Regulations Governing the Administration and Enforcement of the Fresh Water Wetlands Act, 250-RICR-150-15-3 ("Rules"). This review included a site inspection of the above referenced property ("subject property") and an evaluation of the proposed installation of a water chlorination pipe between an existing pump house and an emergency vault, a concrete pad to house chlorination equipment, overhead electrical connection, with soil disturbance, associated site alteration and temporary erosion controls as illustrated and detailed on site plans submitted with your application. These site plans were received by the DEM on April 23, 2024.

Our observations of the subject property, review of the site plans and evaluation of the proposed project reveals that alterations of jurisdictional areas are proposed on A.P. 3B, Lot 1-1. However, pursuant to Section 3.7.3A of the Rules, this project meets the General Variance Criteria (or Section 3.7.3B of the Rules for Public and Governmental Bodies, Section 3.7.3C of the Rules for Alternative Configuration of a Vernal Pool Buffer Zone, or Section 3.7.3D of the Rules) and a **Freshwater Wetlands Permit** may be issued under the following terms and conditions:

Terms and Conditions for **Wetlands Application No. 24-0078**

1. This letter is the DEM's permit for this project under the R.I. Fresh Water Wetlands Act, R.I. Gen. Laws § 2-1-18 et seq.
2. This permit is specifically limited to the project, site alterations and limits of disturbance as detailed on the site plans submitted with your application and received by the DEM on April 23, 2024. A copy of the site plans stamped approved by the DEM is enclosed. Changes or revisions to the project that would alter freshwater wetlands are not authorized without a permit from the DEM.

3. Where the terms and conditions of the permit conflict with the approved site plans, these terms and conditions shall be deemed to supersede the site plans.
4. You must notify this Program in writing of the anticipated start date, and of your contractor's contact information, by submitting the Notice of Start of Construction Form prior to commencement of any permitted site alterations or construction activity. You must also notify this Program in writing upon completion of the project. The Start of Construction Form can be found on the webpage: dem.ri.gov/stormwaterconstruction.
5. A copy of the stamped approved site plans and a copy of this permit must be kept at the site at all times during site preparation, construction, and final stabilization. Copies of this permit and the stamped approved plans must be made available for review by any DEM or town representative upon request.
6. Within ten (10) days of the receipt of this permit, you must record this permit in the land evidence records of the Town of Richmond and supply this Program with written documentation obtained from the Town showing this permit was recorded.
7. The effective date of this permit is the date this letter was issued. This permit expires five (5) years from the date of this letter unless renewed pursuant to the Rules.
8. Any material utilized in this project must be clean and free of matter that could pollute any jurisdictional area.
9. Prior to commencement of site alterations, you shall erect or post a sign resistant to the weather and at least twelve (12) inches wide and eighteen (18) inches long, which boldly identifies the initials "DEM" and the application number of this permit. This sign must be maintained at the site in a conspicuous location until such time that the project is complete.
10. Temporary erosion and sediment controls detailed or described on the approved site plans shall be properly installed at the site prior to or commensurate with site alterations. Such controls shall be properly maintained, replaced, supplemented, or modified as necessary throughout the life of this project to minimize soil erosion and to prevent sediment from being deposited in any freshwater wetland, buffer, floodplain, area subject to storm flowage, or area subject to flooding or other jurisdictional areas not subject to disturbance under this permit.
11. Upon permanent stabilization of all disturbed soils, temporary erosion and/or sediment controls must be removed.
12. You are obligated to install, utilize and follow all best management practices detailed or described on the approved site plans in the construction of the project to minimize or prevent adverse impacts to any adjacent freshwater wetland, buffer, floodplain, or other jurisdictional areas present and the functions and values provided by such freshwater wetlands, buffer, floodplain, and jurisdictional areas.
13. Any vegetation clearing within the proposed limit of disturbance (LOD), since the LOD and erosion controls are depicted beyond the proposed trench, shall be minimized to the extent possible. Any disturbed areas within previously vegetated buffer must be stabilized and allowed to revegetate naturally.

Pursuant to the provisions in 250-RICR-150-15-3.8.13 and 250-RICR-150-15-3.14.4(A), as applicable, any properly recorded and valid Freshwater Wetlands Permit is automatically transferred to the new owner upon sale of the property.

You are required to comply with the terms and conditions of this permit and to carry out this project in compliance with the Rules at all times. Failure to do so may result in an enforcement action by this Department.

In permitting the proposed alterations, the DEM assumes no responsibility for damages resulting from faulty design or construction.

Kindly be advised that this permit is not equivalent to a verification of the type or extent of freshwater wetlands on site. Should you wish to have the types and extent of freshwater wetlands verified, you may submit the appropriate application in accordance with 250-RICR-150-15-3.9.3. Please note that the B-Series wetland was determined to be a Vernal Pool.

This permit does not remove your obligation to obtain any local, state, or federal approvals or permits required by ordinance or law and does not relieve you from any duties owed to adjacent landowners with specific reference to any changes in drainage.

Please contact Sophie Clode of this office (telephone: 401-537-4211) should you have any questions regarding this letter.

Sincerely,

Nancy L. Freeman, Environmental Scientist III
